

HOPPE Adapter solution for 350KL Oval cylinder hole OZ03

duraplus[®]

HOPPE has developed an adapter solution for HOPPE 350KL oval cylinder hole OZ03.

This new solution offers more flexibility:

- The adapters bring much more flexibility to our customer and even more to the end-user.
- The basic product 350KL oval cylinder hole OZ03 can with adapters be transformed to a Blind (UG) version and to a Turn-knob version.

Stock:

- The stock can be reduced to just one basic product oval cylinder hole OZ03.

Quality:

- The adapters are produced with high quality materials and surfaces.
- The security level will increase by the steel insert in the blind version.

Packing:

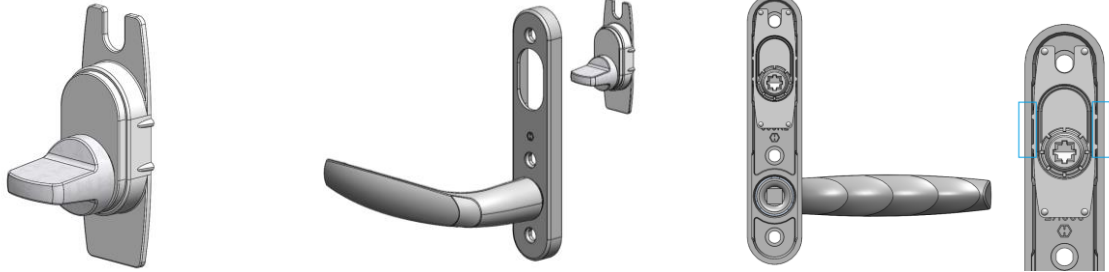

- Adapter parts packed in nylon bags.

350KL Blind version

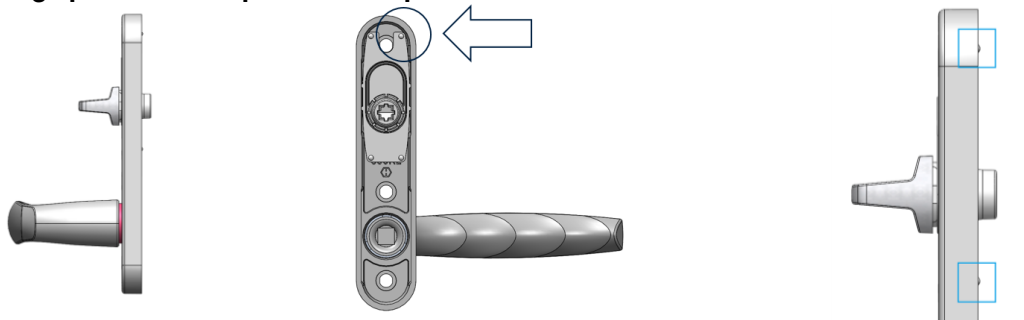

- Blind version for external door-side.
- Cover part in coated plastics material, similar color than 350KL plate.
- Including pre-mounted steel-plate.
- Installation from the inside of the backplate.
- For security reasons adapter and steel plate will be blocked by the upper screw.
- Lateral fixing lugs keep the adapter in correct position.

350KL Turn-knob version

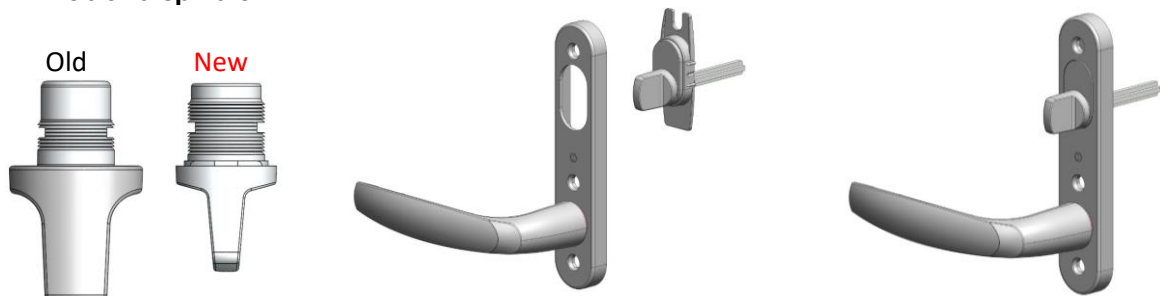

- Version with the new turn-knob for internal side.
- Adapter part and turn-knob are produced in coated plastics material, similar color than 350KL plate.
- Installation from the inside of the backplate.
- Lateral fixing lugs keep the adapter in correct position.

Bottom lugs press the adapter into the plate once it is installed on the door.

Turn-knob and spindle

- New turn knob
- Turn knob is smaller than earlier as it needs to fit inside the OZ03 hole.
- Spindle remains same as until now.
